

Ressource Solutions

SAFE, EFFECTIVE SAFEGUARDS FOR NOZZLES.

As a brand, **Ressource Solutions** was established in 2017. As a business and OEM, our experience and know-how traces back to 2001 when our journey to producing a sophisticated, multiple-product, fully automated fuel management system (FMS) started. The FMS is called **PetroMan** and is regarded with high prestige by dozens of successful users across several industries globally. **Ressource Solutions** is the official supplier of the **PetroMan** FMS in all countries outside South Africa. Further development, growth, and offering expansion has today established **Ressource Solutions** as not only a leader in the FMS space, but also in asset optimisation.

The design, flexibility, and reliability of our technology enables superior system functionality, effectiveness and efficiency. This competitive advantage allows **Ressource Solutions** to successfully provide, and implement, comprehensive, leading-edge asset optimisation solutions at significantly lower costs compared to conventional offerings.

Most industrial users of large quantities of fuel will tell you that their most pressing fuel-related issue is the price of fuel. If you do some digging, it won't be too long before fuel theft and fuel misuse are mentioned. There are numerous complementary products and solutions that mitigate fuel theft and misuse. These include fuel management systems, tank gauging options, anti-syphoning products, and nozzle security.

Essentially, nozzle security can be applied using an electronic interface (e.g. RFID tagging) or a mechanical interface. Electronic interfaces require the support of a relatively complex automated fuel management system. Mechanical interfaces are far more uncomplicated and do not require the support of automated fuel management systems, making mechanical nozzle security a highly effective option.

**EFFICIENCY IS VITAL TO
PROFITABLE BUSINESS,**
and that is the business
we are exceptional at.

COMPREHENSIVE, LEADING-EDGE ASSET OPTIMISATION SOLUTIONS

The features of our patented mechanical **PetroSecure** nozzle safeguarding solution include:

- Patented anti-theft nozzle for enhanced security
- Lockable fuel protection through numerous nozzle-to-filler combinations
- Equipment/vehicle fuel distribution assurance (allocation to specific filling points)
- Durable mechanical design (tested in remote and rugged conditions)

The benefits of implementing **PetroSecure** include:

- Immediate reduction in fuel losses
- Cost-effective for any size fleet
- Simple and quick installation procedure
- Customizable for multiple vehicles and filler point control

Our competitive edge ultimately lies in **FINDING THE PERFECT BALANCE** between man and machine, between technology and a human touch.

The **PetroSecure** nozzle safeguarding solution consists of **two parts**:

FITS INTO THE PETROL NOZZLE

FITS INTO THE VEHICLE'S FUEL FILLER
