

Value-Add Enhancements

Proven efficient, cost-effective, and modular options.

Ignition, Key Control and Pre-start

- Driver ID, license & history
- Pre-start checklist
- Medical & induction validity
- Legislative compliance
- Usage data & validity

PetroSecure and Anti-Syphoning

- Patented anti-theft devices
- Lockable fuel nozzle protection
- Fuel distribution assurance
- Durable, tested mechanical design
- Cost-effective for any size fleet

Generator Monitoring

- Uninterrupted power supply
- Immediate operation as needed
- Remote stop/start control
- Remote monitoring: fuel, battery level, voltage, etc.

Driver management

Theft prevention devices

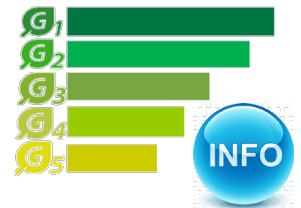

Generator control

Sustainability reporting

Filtration solutions

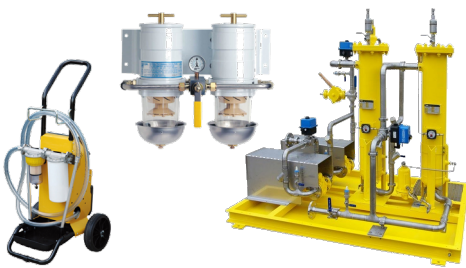

Automated usage reports

Green Index

- World Bank reports
- Consumption values
- Carbon footprint calculation

Next-level Filtration

- Multifunctional (Gensets, kidney, static & mobile)
- Coalescing, purification & cleanliness levels
- Excellent capture and micron efficiency
- Low cost \$/liter filtration solutions (Particles & water)
- Standard and bespoke options

Rebate Claims

- Compatible Tax Authority reports
- Eligible & non-eligible monitoring
- Legislative change updates
- Agriculture, forestry, generation, marine, mining & rail
